

IF YOU DONT RECIEVE DETAILS WITHIN 30 MIN AFTER PURCHASE PLEASE
CHECK YOUR SPAM EMAILS

TOS install Directions

1. If you ever experience buffering or interruption in service please follow the troubleshooting guide at the bottom of this email.
2. If your firestick is brand new you will need to first sign in to your firestick with your Amazon account or create one. Don't worry about selecting apps or setting parental controls as you can do it later.
3. For those that use AT&T internet, they have made a change recently that affects IPTV connections. You will need the AT&T Smart Home Manager app on your smartphone and navigate to App Preferences and toggle off the "Enable Security" setting.
4. "You can turn off Advanced Security from the Connect tab in both the Xfinity app and the xFi website. Simply, click on the Advanced Security tile and follow the steps to disable Advanced Security."

You should be able to add the streaming URL

<https://swm.re>

under allowed URLs OR just turn OFF advanced security settings.

Video Walkthroughs

Written Quick Start Guide

Go to Settings (gear on the far right)

Select "My Fire TV" - may be called "Devices"

Select "Developer options"

ADB debugging - ON

Apps from Unknown Sources - ON

Some firesticks have a new update. To turn on unknown source and developer options on your Amazon Fire TV or Firestick:

→ Open the Settings menu 

→ Navigate to My Fire TV > About

→ Click your device's name 7 times until you see "No Need, You Are Already a Developer."

You may also follow this video: <https://youtu.be/40iVXrTWcPU>

Click the home button on your remote (little house)

Select "Find"

Select "Search"

Type in "Downloader"

Select Downloader

Click down the arrow to download

Click the home button on your remote

Scroll right to the 3 squares and plus sign symbol

Scroll down until you see the Downloader App.

Smarters Player Lite - <https://play.google.com/store/apps/details?id=com.nst.smartersplayer>

Then open the app

Add new user

Xtream Codes API (might say XC API)

Any Name: Enter any name without space

Username:

Password:

URL: <https://swm.re>

Troubleshooting Buffering

1. Make sure you're not getting throttled

Go to search on firestick

Type in WiFi speed test

Use any free one and look at the download and upload speed.

Minimum 25 download (optimal 50)

Minimum 15 upload (optimal 25)

Unplug the power source from both stick and router same time for 30 secs. Allow the DNS to reset

- []

Lastly, clear the cache

Settings on stick

Applications

Manage installed applications

Choose the app

Clear cache (don't clear data)

Lastly, if it still isn't working hit clear data 3 times and log back in.
